Yokohama Triennale 2008. Japan's largest international contemporary art exhibit, will finally kick off on September 13, 2008 in the port city of Yokohama.

The theme of this year's exhibition is 'Time Crevasse'. Under this theme, works by 74 artists from 25 different countries and regions will be exhibited, including large scale installations, film and videos, photography, sculpture, and live performances, which can only be embraced by coming to Yokohama to share the experience at first hand.
