

A True-to-Life Portrait of Japan to the World

From the language and arts to heartfelt hospitality, the diverse facets of Japanese culture are a focus of international attention today.

The Japan Foundation paints a true-to-life portrait of Japanese culture and society, and introduces it to the world with an eye to expanding dialogue and promoting cultural exchange between the people of Japan and other countries.

Having entered the 21st century, the role of cultural exchange is being appreciated anew across the globe.

We hence aim to make even greater strides to foster mutual understanding and further deepen bonds, so that Japan may live hand-in-hand with the world.
